

The background of the cover is a vibrant, cartoon-style illustration of an underwater scene. At the top, a blue oval contains the text 'NSW'. Below it, a large red oval contains the title 'Targeting Maths' in yellow, with 'Australian Curriculum Edition' in a yellow banner below. Further down, a yellow banner contains the text 'FULLY ALIGNED TO NSW MATHEMATICS K-10 SYLLABUS'. Below that, a blue banner contains the text 'Stay on target with Australia's favourite Maths program'. On the left side, there is a list of features with star icons. At the bottom left is the Pascal Press logo. At the bottom center, a yellow banner contains the text 'Targeting Maths has all this and more!'. The background features a large grey dolphin in the foreground, a green sea turtle on the left, two yellow fish and a red fish swimming, and various colorful coral reefs and sea anemones in shades of red, orange, purple, and blue. Bubbles are scattered throughout the water.

NSW

Targeting Maths

Australian Curriculum Edition

**FULLY ALIGNED TO
NSW MATHEMATICS K-10 SYLLABUS**

Stay on target with Australia's favourite Maths program

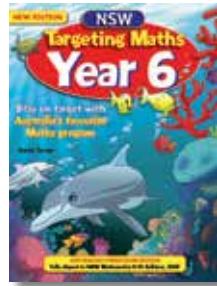

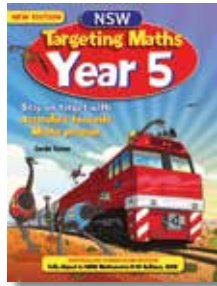

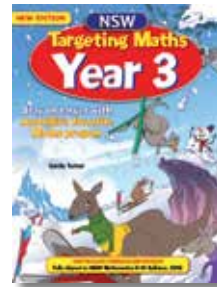

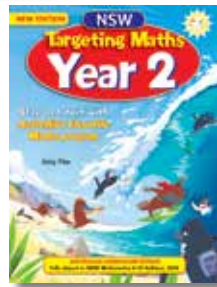

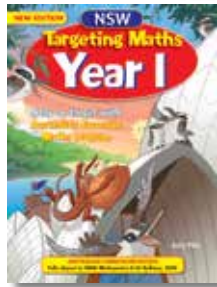

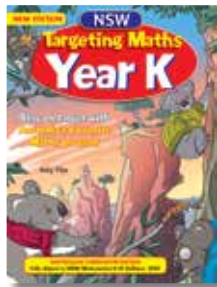

- ★ National Curriculum/NSW alignment
- ★ iPad apps aligned to topics
- ★ Fully-integrated Problem-solving Program
- ★ Term Investigations
- ★ In-stage topic alignment for composite classes
- ★ Revision Tests build skills for Australia's National Testing Program (NAPLAN*)
- ★ Interactive whiteboard activities for front-of-class teaching

Targeting Maths has all this and more!

NSW

Targeting Maths

Australian Curriculum Edition

Australian Curriculum/NSW alignment

This Edition fully aligns with both the NSW Syllabus and the Australian Curriculum. The NSW Syllabus outcomes appear alongside the Australian Curriculum Code and Content Descriptions on each student page.

Working Mathematically coverage is shown by these 3 icons:

Communicating  , Reasoning  and Problem solving

In-stage topic alignment for composite classes

The Targeting Maths range is great for composite classes too. The contents of year level books in one stage, eg Year 3 and Year 4, match topic by topic, making teaching composite classes much easier.

Year 3 Contents

Australia's Favourite Maths Program

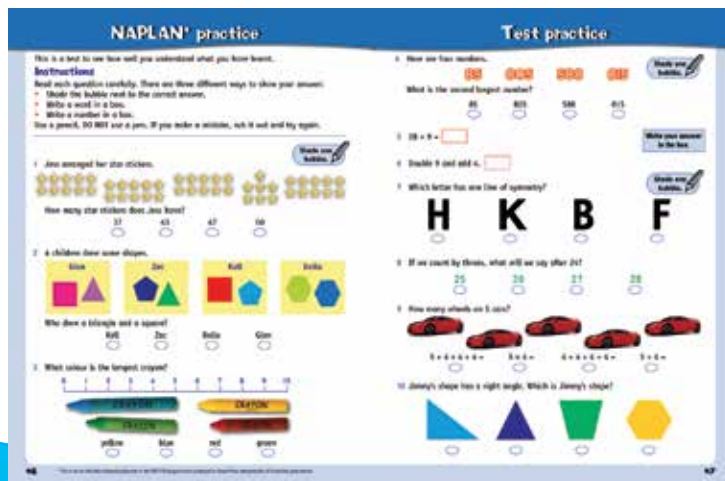

Fully-integrated Problem solving Program

The NSW Targeting Maths includes an integrated problem solving program that actively builds students' abilities to think mathematically, solve problems and communicate their answers in a variety of ways.

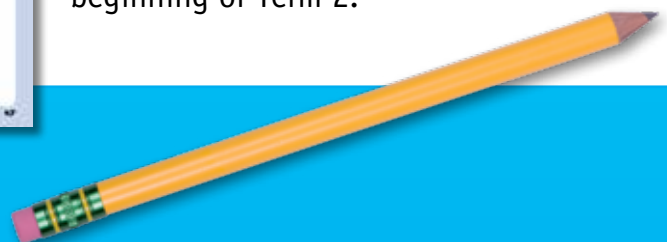

Term Investigations

Each term includes one large but easy-to-manage investigation that gets students planning and working through an extended problem.

Revision tests build skills for Australia's National Testing Program (NAPLAN*)

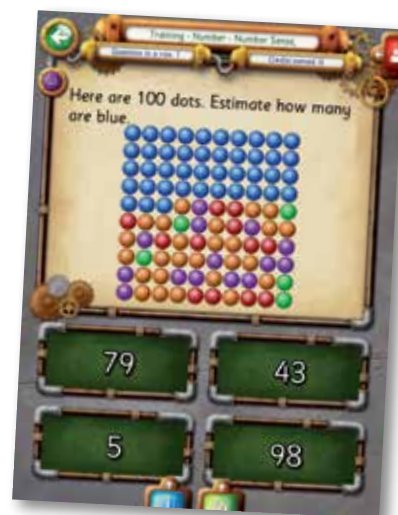

Mid-term revisions appear in the form of a multiple choice, NAPLAN*-style practice test. Student books for Years 3 to 5 include a full eight-page preparation test at the beginning of Term 2.

* These are not officially endorsed publications of the NAPLAN program and are produced by Pascal Press independently of Australian Governments.

iPad Apps

The Targeting Maths Apps, one for each Year Level K – 6, take all the essential maths content that children need to know and present it as amazing apps that makes learning maths facts fun, motivating and full of rewards. Look for them in the App store today! Made especially for the iPad.

Interactive whiteboard activities for front-of-class teaching

Rainforest Maths

Each Targeting Maths Teaching Guide includes the complete Rainforest Maths CD-ROM for that level. The Targeting Maths Teaching Guides cross-reference each topic of work to the matching Rainforest Maths interactive activity.

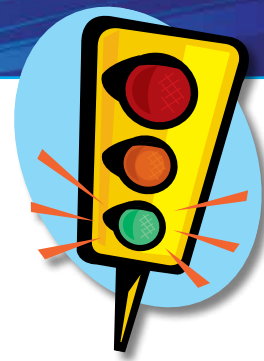

Teaching Guides

These fully revised, full-colour Teaching Guides come with 2 CD-ROMS of interactive activities. One CD-ROM contains an interactive version of the student book. This can be used on computers or on an Interactive Whiteboard (IWB). The second CD-ROM has the complete Year level version of Rainforest Maths. Both CD-ROMs can be loaded onto networks for classroom use.

What makes Targeting Maths Australia's favourite maths program?

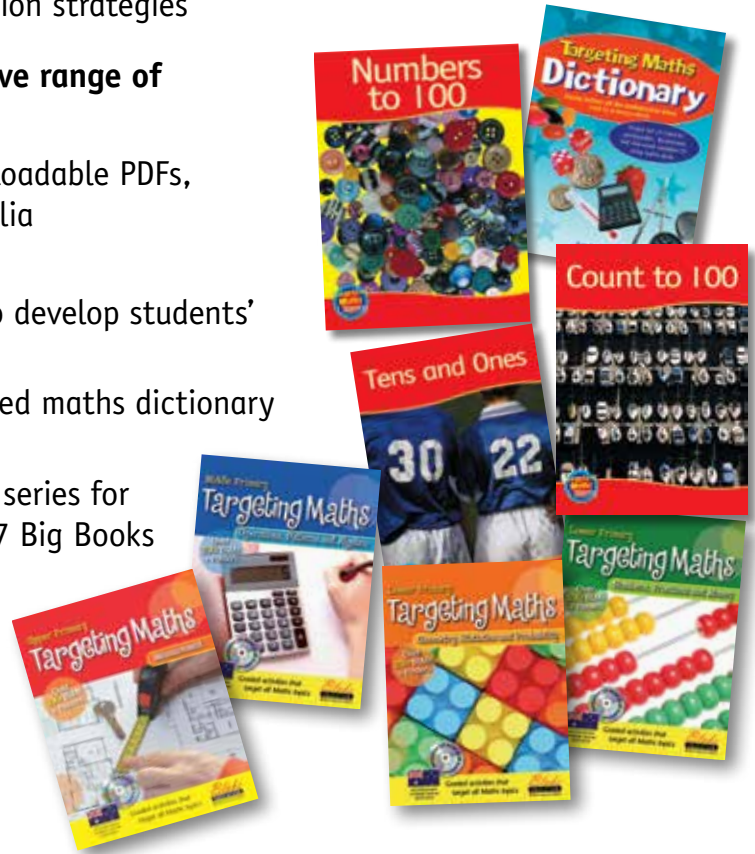

Targeting Maths is used in over 3000 schools across Australia.

- Engaging full-colour page layouts with real life examples
- Complete coverage of the maths syllabus
- Student-friendly activities with instructions that are easy to read and understand
- Structured development of mental calculation strategies

Targeting Maths has the most comprehensive range of supporting materials, including:

- 12 Targeting Maths Blackline Master Downloadable PDFs, the most popular maths resource in Australia
- Targeting Maths Apps— for Years K–6
- Targeting Mental Maths — the best way to develop students' mental maths strategies
- Targeting Maths Dictionary — the most used maths dictionary in primary schools
- Targeting Maths Literacy — a K–2 literacy series for teaching and learning maths topics with 17 Big Books and 51 student reading books
